

KEITH TRAN

Atlanta, GA — ktran380@gatech.edu — (828) 290-3897 — [LinkedIn](#) — [GitHub](#)

EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Engineering

Atlanta, GA

Expected May 2029

Relevant Coursework: Data Structures & Algorithms, Digital System Design, Discrete Math, Linear Algebra

Blue Ridge Community College

Associate of Science

Flat Rock, NC

Completed 2025

HONORS

- **Bill & Melinda Gates Scholar** — Top 1.5% of 48,000+ applicants; one of 750 selected nationally
- **Western Carolina Community Foundation Scholar** — Nathaniel Ellis Cannady Jr. Recipient

SKILLS

Languages

Python, Java, C, C#, TypeScript, JavaScript, HTML/CSS, XAML

Frameworks & Tools

PyTorch, TensorFlow, OpenCV, React Native, Spring Boot, Supabase, Docker, Git

Concepts

Computer Vision, Object Detection, Embedded Systems, Full-Stack Development

EXPERIENCE

Software Engineering / ML Intern

Elkamet Inc.

May 2026 – Present

Hendersonville, NC

- Built and deployed 3 YOLO object-detection models in PyTorch that replaced manual visual inspection of notches, defects, and pull tabs on live production lines, grading every part in real time as operators run.
- Engineered a real-time Python inference pipeline processing live video at 30 FPS across 5 cameras, with a .NET WPF operator dashboard that lets floor staff monitor detections and part grades as they happen.
- Designed a production camera mount and refined training datasets from operator feedback, reducing duplicate detections by 98% and cutting manual counting time by 99%, from ~30 s per layer to near zero.

Co-Founder

Create-X Startup Accelerator, Georgia Tech

2025 – Present

Atlanta, GA

- Shipped Seek, an iOS social challenge app: one daily prompt for every user, photo and video proof posted to a friends feed, auto-resolved head-to-head matches, and a coin-and-crate economy.
- Built it in Expo/React Native and TypeScript on Supabase Postgres, with 11 server-authoritative Edge Functions, row-level security across 17 migrations, and EAS builds shipped to 50 TestFlight users.
- Secured \$5,000 in pre-seed funding, incorporated an entity, and ran 100+ customer discovery interviews.

Founder

Smokey Summit LLC

2023 – 2025

Remote

- Built and scaled an Amazon FBM business to \$7,500/month, fulfilling 100+ orders daily across 15+ SKUs.
- Developed internal Python tools tracking orders, margins, and logistics, automating daily reporting.

PROJECTS

Petfolio. Built a full-stack pet-profile web app on a Java/Spring Boot REST API over PostgreSQL with a React/TypeScript frontend, containerized with Docker for reproducible local and cloud deployment.

Piano LED MIDI Visualizer. Built a multithreaded Python MIDI visualizer on a Raspberry Pi 5, driving 180+ WS2812B LEDs over SPI with pitch-to-color and velocity-to-brightness mapping in real time.

Hand-Me-Up (Cox Hackathon). Built a React Native app that photo-grades outgrown kids' clothing by condition and routes each item to resell, donate, or recycle, pairing mobile capture with a trained classifier.

ADDITIONAL INTERESTS

Gardening, Piano, Hiking, Camping, Traveling, Weightlifting, Baking, iOS Development
